

UNUM Accessibility Policy

Version August 3, 2021

Our UNUM development team is committed to providing an accessible and usable website for our visitors and for the innovation community, including visitors and innovators with disabilities. With every new enhancement our development team tests and improves UNUM for accessibility and usability in order to conform to the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines 2.1 Level AA (<https://www.w3.org/WAI/>).

UNUM has been thoroughly tested using current versions of Edge, Chrome, and Safari, and the most common versions of iOS and Android.

We continually seek to improve the accessibility and usability of UNUM with each enhancement. If you encounter any difficulties in using UNUM, please do not hesitate to contact us at support@unum.nsin.us.
